

REMARKS

The claims have been amended to clarify that a source system identifier is sent along with the identifier of the requested training video, which source system identifier identifies the particular medical diagnostic scanning system that will be used to view the training video. The requested training video is made available to an operator of the medical diagnostic scanning system if the scanning system identified by the source system identifier has a subscription associated therewith. This is in contrast to the teaching of the Sawa patent of record, wherein the broadcast is authorized "when the identity of the requesting client is authenticated by the client management server 4" [col. 3, lines 34-35]. Sawa neither discloses nor suggest that the video data is delivered in response to authentication of the client terminal 2.

In view of the foregoing, the Applicants submit that this application is now in condition for allowance. Reconsideration of the application and allowance of claims 1-3, 5-9 and 19-28 are hereby requested.

Respectfully submitted,
